SUMMARY

Software Developer specializing in frontend and full-stack web development, with experience building secure and scalable applications using React, Next.js, and Laravel. Experienced in leading frontend development for academic systems and integrating authentication, authorization, and role-based access control. Strong foundation in web security with a security-first approach to building reliable applications.

WORK EXPERIENCE

UIN Syarif Hidayatullah Jakarta

Frontend Engineer Lead & Penetration Tester

Ciputat, Tangerang

Nov 2025 - Jun 2026

- Led development of the faculty's OBE system, designing role-based interfaces and collaborating with backend teams on authentication and authorization.
- Maintained and enhanced the Laravel/Livewire-based Layanan FST application serving **800+ students and faculty members**.
- Integrated secure authentication and role-based access control across faculty web applications.
- Conducted security testing to identify XSS, Broken Access Control, and privilege escalation vulnerabilities.

SELECTED PROJECTS

NusaShield

OSINT Financial Threat Hunter | [project link](#)

- OSINT threat-intelligence platform designed to detect potential financial data leaks across public forums, social media, and paste sites.
- Built automated data collection pipelines processing **5 sources**, with normalization and relevance classification to prioritize potential threats

AmaTI

Academic Monitoring System | [repo link](#)

- Web-based academic monitoring platform designed to help parents track and understand students' academic progress.
- Developed application workflows involving authentication, API integration, and database-driven data processing.

LedgerLens

Blockchain Forensics Tool | [repo link](#)

- A recursive token tracking application providing end-to-end visibility across wallets, DEXs, and crypto mixers.
- Engineered the core recursive tracking algorithm and backend services using Python to parse multi-hop transaction data efficiently.

EDUCATION

UIN Syarif Hidayatullah Jakarta

Bachelor of Computer Science

Current GPA: 3.67

Tangerang Selatan

Graduation Date: Jun 2027

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS

Database: MySQL, MongoDB, SQLite

Backend: Node.js, Express.js, Laravel

Tools: Git, Docker, Postman

Frontend: React, Next.js, Livewire, Tailwind CSS
